

Standard Field: Uses identical top and bottom Corner Gussets

Competition Field Corner Bracket replaces the top or bottom Corner Gusset to ease assembly

To attach the Competition Field Corner Bracket insert a 1/4-20 bolt in the upper and lowermost holes and tighten with a wingnut as shown.

Note:
The Competition Field Corner Bracket **MUST** be used in conjunction with a Corner Gusset on either the top or bottom of the field wall. Failure to do this may result in damage to the field perimeter.
